FRAMO eTrucks factory logistics

Quiet, clean and safe power packs

The use of eTrucks in factory logistics requires quiet, clean and safe vehicles, which are reliable and economical. FRAMO provides you with precisely these eTrucks.

FRAMO eTrucks are 100% electrified and emission-free.

Logistics in companies, but also communities, environmental zones or noise sensitive areas are no problem starting from now, with your FRAMO eTruck, and that in a very economical and environmentally conscious way. With FRAMO you have a partner on your side, who not only conceives and manufactures your eTruck to your requirements, but can also put together an ALL IN ONE package for you, so that you can concentrate on your core business.

The combination of research and development, with longstanding experience in the area of eTrucks, has allowed FRAMO even today, to develop and manufacture eTrucks for factory logistics, suitable for everyday use, that don't require any compromises.

FRAMO eTrucks are 100% operationally ready. With your FRAMO eTruck you are stepping into the future today, which is already reality at FRAMO. FRAMO brings you to your eWay.

Our eWay specialists would be pleased to advise you in detail about your eTruck, and the diverse possibilities and ALL IN ONE offers for driving a FRAMO eTruck.

We look forward to hearing from you at www.framo-eway.com.

Your FRAMO Team

eTrucks
NOW!

- + 100% electric
- + 100% emission-free
- + 100% high performance

- The modular, continual drive of your FRAMO eTruck provides you with the power to master all the requirements of daily operation, and uses the braking energy of the vehicle to charge the battery.

- With the tried and tested chassis of your FRAMO eTruck you are safe on the road. With a multitude of variation and equipment options, we configure your FRAMO eTruck, which matches your requirements exactly.

- With your FRAMO eTruck, you can experience a completely new driving feeling in terms of acceleration and driving dynamics. Simple operation relieves the driver and pre-serves the vehicle.

- Your FRAMO eTruck is fitted with a modular ePower battery pack, precisely tailored to your requirements, with which high ranges are possible. The onboard charger and the quick charging option ensures that your FRAMO has maximum availability.

Drive your eWay

Highest availability with minimal costs - that is the claim that FRAMO follows with vehicles, energy and service solutions, so that customers and the environment benefit.
